

**STRATEGIC PARTNERSHIP PROGRAM
ACTIVITY NOTIFICATION**

Date of Issue	21 August 2026
Activity Code	2026-SPP-SG-F2-03
Title	Multicountry Workshop on AI and Impact on Workforce
Timing	14–17 September 2026
SPP Member(s)	Singapore
Venue City(ies)	Singapore
Modality	Face-to-face
Implementing Organization(s)	Singapore Productivity Centre
Participating Country(ies)	All Member Countries
Overseas Participants	10
Local Participants	5
Closing Date	30 August 2026
Remarks	Not Applicable

Focus Area	2: Human Capital Development A future-ready workforce to support economic and enterprise transformation.
Primary Key Results	Pillar 3: Capacity Empowerment Singapore has demonstrated an improved capacity to deliver targeted interventions to drive productivity growth.
Indicator	Participants have learned; and concept notes to assess AI impact on workforce tools have been developed.
Description	Artificial intelligence (AI) is rapidly reshaping job roles, skills requirements, and workforce structures across economies. While AI presents significant opportunities to enhance productivity, competitiveness, and innovation, it also creates challenges related to job displacement, skills mismatches, and workforce readiness—particularly for small and medium sized enterprises (SMEs) and developing labor markets. Many economies lack practical frameworks and institutional capabilities to systematically assess AI's impact on their workforce and to design targeted, humancentric workforce transition strategies. There is therefore a strong need for capacity-building platforms that equip policymakers and practitioners with foundational AI literacy, practical tools to assess workforce impact, and actionable strategies to develop AI-ready workforces that support inclusive and sustainable growth. This workshop responds to this need by strengthening institutional capabilities and fostering peer learning across participating economies. Objectives include building foundational AI literacy; developing capacities to assess AI's impact on local labor markets; and establishing strategies for AI-ready workforces. The workshop, together with the postworkshop scheme development phase, will contribute to strengthening institutional capacity among participating economies and support the development of forward-looking, inclusive workforce policies in the age of AI.
Topics	Understanding AI concepts and applications relevant to workforce development; Sharing country experiences and challenges in managing AI's labor market impacts; and Co-developing practical assessment tools and strategies to build AI-ready workforces.
Qualifications	Government officials, policymakers, academics, consultants, and representatives of NPOs involved in workforce strategies or human resource/capital management.

REFERENCE INFORMATION

Officer In-charge	Nobutsugu Miyama (CSI)
SPP Coordinator	Rie Minamoto (CSS)
Activity Type	IN
Activity Category/Open	Open
SPP Points Planned	12
Planned Budget	USD36,000.00
Budget Comments/ Nomination of Participants	• Singapore allocates 4 points for RPs, Operational Support Cost, and inviting participants, respectively. • Points for overseas participants will be covered by participating economies.
