Closing Date	~~23 October 2026~~ NPO Pakistan Deadline: 20 October 2026
Remarks	Not Applicable

Focus Area	Focus Area 1: Digital Transformation Sri Lanka has advanced digital transformation (DX) by expanding e-governance, integrating digital platforms, and enhancing service delivery to boost public-sector productivity and ensure wider citizen access to the digital economy.
Primary Key Results	Pillar 3: Capacity Empowerment Targeted training programs and e-learning modules have been rolled out to equip public servants with the knowledge and tools needed to deliver services digitally.
Indicator	To what extent are insights gained both domestically and internationally systematically shared within the organization, for example, through seminars, workshops, and articles.
Description	The Digital Government Outlook 2026 highlights the need for whole-of-government approaches that prioritize user needs, data-driven policy-making, and platform-based delivery models. APO members have been developing national strategies to address emerging opportunities and challenges associated with DX and the adoption of digital technologies. However, further efforts are required to strengthen digital platforms and enhance the implementation of national digitalization and DX strategies, which are expected to contribute to greater citizen engagement and improve the efficiency, effectiveness, inclusiveness, and productivity of public-sector service delivery. This workshop will provide a platform for exchanging knowledge of and good practices in the imperatives and progress of public-sector DX. It will also examine approaches to digital government, e-governance, digital public services, data governance, and national digital transformation strategies that lead to advancing citizen-centered, efficient, effective, inclusive public services.
Topics	Understanding DX concepts and applications for e-governance; Sharing country experiences and addressing challenges in DX; Advancing inclusive, citizen-centered public services; and Strengthening national strategies for DX.
Qualifications	Policymakers and government officials, staff and representatives of government enterprises, and staff of public-sector organizations involved in digital government programs, e-government systems, e-public services, e-governance, management information systems (MIS), and ICT.

Please refer to the implementation procedures circulated with this document for further details.

Dr. Indra Pradana Singawinata
